Format Menu Commands

The FORMAT MENU tab offers the following commands.

Command	Description
Remove Non Printables	Removes all non-printable characters at the cursor location.
Uppercase	Convert all lower case letters to upper case letters
ADJ DTG	Changes the DTG fields or all or selected message by a user specified period of time. If a checksum is associated with the DTG field the checksum will be recalculated.
ADJ LatLon	Change the latitude and longitude fields of all or selected messages by a user specified number of degrees, minutes, second or decimal seconds.
ADJUST NMEA GPS	Recalculates checksum values for the NMEA0183 data standard.
ADJUST TRE DTG	Adjusts the data time group associated with TRE data
OTFM Headers	Manipulate message headers.
